Consultations help supervisors and managers to effectively deal with troubled employees, initiate a supervisory referral, and understand how to maintain positive, productive work environments for their employees. KEPRO can provide guidance and coaching on:

- Identifying problem employees (i.e., outbursts, tardiness, co-worker relationships, missed deadlines, absenteeism, low morale, complaints, etc.)
- How to talk with an employee about work performance without focusing on personal problems
- How to develop a constructive intervention
- Confidentiality issues
- Documentation of employee work performance issues
- Defining the supervisor's role in the referral process
- How to utilize the EAP during the referral process; and
- Ensuring all appropriate parties are coordinated for management referrals.

Additionally, our Management Services team possesses extensive experience in the facilitation of organizational consultation and intervention. They can provide in-depth assessments related to a variety of workplace issues. Based on the assessment, the Management Services team will summarize the findings, develop a customized intervention, and offer recommendations regarding how the intervention may be implemented within your organization.

The Management Services team can support you in exploring and resolving situations related to violence in the workplace, workplace trauma, critical event management, organizational downsizing or reduction in force, fostering employee morale and engagement, and the enhancement of workplace relationships.

The successful facilitation of any organizational assessment and intervention process is achieved through sustained communication and collaboration with company leadership and key personnel. KEPRO tailors each intervention to your needs using a variety of clinical, organization, and consultative interventions to achieve the desired outcome. Interventions are always developed and administered with an understanding of your organization's applicable policies, procedures, and culture.
